

Software Developer

Join a Transformational Team

This is a superb time to join our multi-award winning company. With over 15 years' experience, **Seopa Ltd.** is enjoying unprecedented growth as we double our size and profits over the next three years. The right candidates will have an opportunity to work in a friendly, dynamic and inclusive working environment with like-minded, talented and passionate individuals, and will be key players in the evolution of real time systems used by over 3 million people per annum.

Seopa Ltd., a UK based company with branches in Belfast and Timisoara, is an industry leader in creating and hosting financial and energy price comparison engines. In addition to providing our software and systems to other companies, we operate our own insurance comparison brands - Quotezone.co.uk and CompareNI.com.

Our systems enable insurance providers to secure business within their target markets and empower consumers to easily identify those providers who meet their financial product requirements at market leading prices. Our affinity partnership arrangements also facilitate other companies to increase the range of services offered (and revenue generated) via their websites.

With over 400 financial partners in the insurance industry and numerous affinity partners who use our powerful technologies, we are a trusted, respected and successful company, currently enjoying rapid expansion.

Our success has been recognised by a series of awards including six consecutive Deloitte Technology Fast 50 awards, a Deloitte EMEA Technology Fast500 award, and two prestigious Deloitte Best Managed Companies awards in 2017 and 2018.

Role Description

This is an exciting opportunity to build upon your experience as we continue to evolve Seopa's product range and systems. The role involves activities such as developing web applications to support future business growth and improved system performance and (re)architecting key areas within our software. This hands-on role requires the successful candidate to be actively involved in all current and future development projects. As a developer, you will play a key role in ensuring the company software is updated quickly and accurately in line with the company strategy and the changing demands of our partners. As you progress through the company, you will have the opportunity to take on more responsibility in a variety of fields such as development, architecture, team leadership and management.

Job Ref: SDTim0418
